### DETAILED ACTION

Examiner acknowledges receipt of preliminary amendment and IDS filed 10/30/03.

Claims 1-30 are pending.

#### *Priority*

Examiner further acknowledges receipt of claim subject matter disclosed in prior

Application No. 09/696,900, filed 03 October 2001.

#### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6,663,855 in view of Moffat et al. (US 5,498,679).

The difference between the issued claims and the instant claims is that the issued claims fails to name nitroxide as being part of the block copolymer. However, Moffat discloses

Art Unit: 1615

preparation of telechelic, branched or star shaped thermoplastic resins by heating a mixture of multifunctional nitroxide compound and at least one polymerizable monomer compound (abstract, column 4, lines 40-67; column 5, lines 1-33 and claims 1-18). Regarding instant claim 30, human hair encompasses the man hair of the issued claim. Specifically, man hair, which may be considered a specie, anticipates the human hair that may be considered a genus. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare the issued block copolymer. One having ordinary skill in the art would have been motivated to use nitroxide in the polymerization step of the production of the block polymer with the expectation of forming star shaped block copolymer where the molecular weight distribution of the copolymer is controlled and narrow.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.
